#### Description

Hi,  
I upload a file in the ASSIGNEMENT tool.  
I browse my pdf file : mem.pdf  
I put a title : Mon\_Memoire  
I upload the file. That's ok.  
In the database and the filesystem, the file is named something like 44394b5e1e197b180daf45aa8d4631c0  
  
If a teacher download the file, the filename of the file is Mon\_Memoire not the filename.  
The teacher download the file without the file extension. Should be pptx ? pdf ? docx ? xlsx ? txt ? etc ...  
The file downloaded is unusable for the teacher who have to ask the student to explain him how to open the file.  
  
It would be better if the teacher download the file with the original filename to avoid mistake.  
  
The title field should only be usefull for a assignement category which allow assignments handing through online editor.

#### History

##### #1 - 25/01/2013 10:34 - Julio Montoya

- Status changed from New to Needs more info

I suggest that when entering in the "submit paper" page we have 2 tabs:

Submit paper	Write an assignment
Upload field + description + submit button	title + description + submit button

With this 2 forms we could avoid the problem that when uploading a file you have to enter a title, the title will be the filename.

##### #2 - 19/02/2013 16:33 - Hubert Borderiou

When uploading an assignement, the named is crypted in the filesystem

e.g. :  
5ce346efbf00832a1d29af26524fda19

It is impossible to repair issues like that, or to give teacher a tgz of the folder.  
In previous version, it seems that the name on the filesystem has a crypted party and the filename after this crypted part  
e.g. :  
5ce346efbf00832a1d29af26524fda19my\_report\_.pdf

Could we go back to the filename with code+filename ?

##### #3 - 19/02/2013 17:15 - Yannick Warnier

- Category set to Documents

Hi Hubert,

This mechanism helps avoiding the use of bug-prone characters in documents (or change of case - uppercase/lowercase - between operating systems). You should always zip a directory through Chamilo, so the file itself remains well named.

Is this a problem when zipping the files from the interface as well?

(please try to assign a category to new tasks, we hope it will help us put some order in the development)

**#4 - 21/02/2013 17:10 - Hubert Borderiou**

When a teachers has a huge folder of assignments to download, we give him a tgz file.  
We have some work folder that weight more than 300Mo.

Moreover, when a problem occurs, we feel quite alone in front of a directory with files named 5ce346efbf00832a1d29af26524fda19 ^^

Do you think we could name work files in the filesystem with a code like this one concatenated with the filename, modified to use only characters a-z 0-9 \_ and . ?

It would be a convenient compromise I think.

- Target version changed from 1.9.6 to 2.0

**#6 - 11/04/2013 16:21 - Hubert Borderiou**

Damned, problem when uploading a doc to Compilatio, plagiarism detector, the file has no extension...  
need at least the file extension in field url

**#7 - 12/04/2013 10:04 - Hubert Borderiou**

Another side effect, in the Compilatio tool (should be the same with Euphorus)  
the filename is understandable :s  
(see "titre" un img bellow)
