Description

Hi,

Here is the story. When you correct an exam (session of 1 trainee), after correction, the platform returns right into the exercise, which is not good as there is nobody registered.

You need to go back to the trainee to retrieve the exam and click on "all attempts" icon to have the complete info (score, time spent.....)

If in the same session you have several trainees registered, then after correcting an exam (for the second trainee, as the first one you get the previous behavior) you are redirected to the session, so you see the list of your trainees with the recap (I think this is the right behavior :)).
