Description			
From the score displaying bug case, an idea came to me. Is there a way to have on a radio button choice basis a way to select how the attempts are displayed? Her is how I do imagine the feature: The trainer/admin has the choice of display the latest attempt only, display the best score attempt, display all attempts, no display at all. Using this, in case of practice, the trainee can see his progress, in case of exercise, He can see his best result and in case on exam it is possible to avoid the tranee having his score in advance.
