

Chamilo LMS - Bug #6223

No filter on allowed chars for DB name during the installation

17/06/2013 15:14 - Jérôme Warnier

Status:	Needs testing	Start date:	17/06/2013
Priority:	High	Due date:	
Assignee:	Jérôme Warnier	% Done:	50%
Category:		Estimated time:	0.00 hour
Target version:	2.0	Spent time:	0.50 hour
Complexity:	Normal	SCRUM pts - complexity:	?
Description			
If a '-' is set in the database name to create, the installation goes through to the last step, where a MySQL syntax error occurs, but as the configuration.php has already been written, you can't get back and fix the problem. Some chars validation should happen on DB name to create.
