

Courses - Bug #6343

Link with ShowInFrame issue

03/07/2013 14:47 - Anonymous

Status:	New	Start date:	22/06/2012
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	LCMS 4 Beta	Spent time:	0.00 hour
Complexity:	Normal		

Description

Scenario:

Create a link with the ShowInFrame option and the following url: <http://projectbritain.com/>

Publish it in your course and try to open the Links tool ... the website is not opened in an iframe but in the browser frame.

Very strange behavior

Other websites are shown in the iframe. Maybe the external website contains a redirect to prevent this behavior?
