Complexity:	Normal		

Description

It's impossible to remove duplicated objects from the repository.

Removing only worked with complex objects where "kopie" was added after duplicating.

I duplicated a picture and a docx file, no "kopie" was added to the name. I tried to delete these CO's, but no way. (they are not published in any other object). In the upper right corner, I get the message that the object was moved to the recycle bin, but it's still in the repository.

History

#1 - 05/07/2013 10:10 - Sven Vanpoucke

- Status changed from New to Needs testing
- Assignee set to Sven Vanpoucke

There was a bug with the copied objects that were failed (cfr no (copy) was added to the title). These objects are corrupt and can not be edited / deleted / copied anymore. This should be solved (for newly duplicated objects) with the fix of the duplicater bug.

#2 - 05/07/2013 10:49 - Anonymous

- Status changed from Needs testing to Bug resolved
- Target version changed from LCMS 4 Beta to LCMS 4
