

External Repositories - Bug #6365

GoogleDocs: fatal error

05/07/2013 12:58 - Stefaan Vanbillemont

Status:	Needs testing	Start date:	05/07/2013
Priority:	High	Due date:	
Assignee:	Ludwig Theunis	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	LCMS 4 Beta	Spent time:	0.00 hour
Complexity:	Normal		
Description			
when trying to import a PDF version of a GoogleDocs file. See screenshot			

History

#1 - 08/09/2013 11:51 - Ludwig Theunis

- Priority changed from Normal to High

This fatal error occurs for whatever type of file you try to import from google, but also when you try to import from other external repository's; for example from dropbox to the repository.

So it seems to be a more general error!!!

Fatal error: Class 'file' not found in .../common/libraries/php/share/storage/data_class/data_class.class.php on line 96

#2 - 09/09/2013 16:35 - Ludwig Theunis

- Status changed from New to Needs testing

- Assignee set to Ludwig Theunis

get_type_name replaced by class_name in php/lib/manager/component/importer.class.php

Also implemented the fix which is needed to be able to import documents....
