

Courses - Bug #6388

Repository - View: unlink object error

09/07/2013 09:21 - Anonymous

Status:	New	Start date:	09/07/2013
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	LCMS 4 Beta	Spent time:	0.00 hour
Complexity:	Normal		
Description			
Scenario: I made an announcement with a Youtube movie as body and a document as attachment. Go to the repository and unlink the announcement by first clicking on the object and then unlink it in the view. You get a notification that the announcement is unlinked, but in fact you get an error. Check the screen shot for more information.

Scenario:

I made an announcement with a Youtube movie as body and a document as attachment.

I published the announcement in 2 different courses.

Go to the repository and unlink the announcement by first clicking on the object and then unlink it in the view.

You get a notification that the announcement is unlinked, but in fact you get an error.

Check the screen shot for more information.
