### History

#### #1 - 19/08/2013 17:14 - Anonymous

in file `repository/content_object/peer_assessment/php/lib/complex_display/component/status_viewer.class.php`

in method `render_action_bar()`: a link is created to `ACTION_OVERVIEW_RESULTS` (= results viewer), however the requested icon is the lock icon (`common/libraries/resources/action_setting_true_locked.png`) and the label is 'ToggleStatus'

It can be changed to icon to `action_view_results` and label 'ResultsOverview', however, thsi link already exists in the action bar.

A link to the status viewer seems redundant as the page is already the status viewer...
