

Chamilo LMS - Bug #7237

Hidden exercises appear in lessons in session report chart

21/08/2014 15:51 - Yannick Warnier

Status:	Bug resolved	Start date:	21/08/2014
Priority:	Urgent	Due date:	
Assignee:	Julio Montoya	% Done:	100%
Category:	Sessions	Estimated time:	0.00 hour
Target version:	1.9.10	Spent time:	0.00 hour
Complexity:	Normal	SCRUM pts - complexity:	?

Description

To reproduce (quite complex case):

- create a student
- create a course
- create a session and include the course and the student in it
- go to the session+course and create 3 quizzes with one question each and a publication date (and a publication end date)
- now create a learning path with a publication date (and end date)
- include **one** of the quizzes in the learning path

Observation: here the quiz that you include in the learning path should be automatically "hidden" in the quizzes list (in exercise tool). This is OK.

Now connect as the student. You should see the session name and the course name in your courses list.

- click the **session's** name
- click the "My stats" tab inside this screen
- you see a chart of all the exercises
- you **also** see the hidden exercise (the one included in the learning path)
- this is wrong (because as an exercise included in a learning path, the results should not show at the same place)

So, the issue here is to make a change in the code that shows the graphic on that session "My stats" tab to hide all the elements of `c_quiz` that are included in a learning path ("`c_lp.c_id = c_quiz.c_id` and `c_lp_item.type = 'quiz'` and `c_lp_item.path = c_quiz.id`" or something like that).

The pull was replaced by <https://github.com/chamilo/chamilo-lms/pull/346>

#3 - 23/09/2014 22:39 - Yannick Warnier

- Priority changed from Normal to Urgent

Yoselyn, estás segura que este cambio no afecta a lo demás en Chamilo (otras listas de ejercicios)? He hecho merge de tu PR un poco rápido, y ahora estoy preocupado de que esto inflencie todo lo demás (en particular las listas en los ejercicios, etc).

Podrías por favor añadir un **parámetro** `$includeNonActive = true`, a la función `get_all_exercises()`, que solo active tu condición adicional cuando está en false, y hacer los cambios respectivos solo para esta llamada?

Tienes que ser **muy** cuidadosa con este tipo de cambios a funciones genéricas.

#4 - 24/09/2014 13:13 - Julio Montoya

La definición de la función "get_all_exercises" ya tiene un filtro de "active" no es necesario agregarle otro mas.

```
function get_all_exercises($course_info = null, $session_id = 0, $check_publication_dates = false, $search_exercise = '', $search_all_sessions = false, $active = 2) {
```

#7 - 29/09/2014 05:00 - Yoselyn Castillo

- Assignee changed from Yoselyn Castillo to Yannick Warnier

After changes applied, i don't see the hidden exercises in report chart. It works ok for me.

Yannick I leave you to close the task because you may want verify something else.
