#### Description

PHP: 5.5  
Chamilo: 1.9.8.2  
Server: Nginx  
OS: Ubuntu Server 14.04 AMD64

Hello to every one, when i'm trying to call the SOAP webservice to create a new course, the system throws a "undefined function" exception.

I'm using this code to call it

```
$data = array('secret_key' => sha1("79.108.247.76".bbbPassword), 'title' => $course->title, 'category_code' => $course->category_code, 'wanted_code' => $course->code, 'tutor_name' => Yii::$app->user->identity->firstname, 'course_admin_user_id_field_name' => "chamilo_user_id", 'course_admin_user_id_value' => Yii::$app->user->identity->id, 'language' => $course->course_language);
//Importamos las librerías de NuSOAP
require_once Yii::getAlias("@vendor") . '/nusoap/lib/nusoap.php';
//Inicializamos el cliente de nusoap
$client = new \nusoap_client('http://lms.scirenetwork.com/main/webservices/soap.php');
if ($client->getError()) {
    die("Error al inicializar el objeto SOAP: " . $client->getError());
}
//realizar una llamada al api
$aanswer = $client->call("WSCourse.CreateCourse", $data);
var_dump($client);
var_dump($aanswer);
var_dump($client->getError());
```

And if you do the "\$client" var\_dump you will get the request even if it failed, and the request is like this (i send you a screenshot):

```
Fatal error: Call to undefined method WSCourse::create_course() in /var/www/clients/client6/web33/web/main/webservices/websevice_course.php on line 115
" ["responseData"]=> string(188) "
```

When i'm going to see the origin of the problem i go to the webservice\_course.php in /main/webservices/websevice\_course.php

```
Line: 115 -> $result = $this->create_course($wanted_code, $title, $tutor_name, $category_code, $language, $course_admin_id, $this->_configuration['db_prefix'], 0);
```

There's no "create\_course" function, so the webservice can't work

#### History

#1 - 25/09/2014 00:48 - Yannick Warnier

- Status changed from New to Needs more info

Hola Borja,

No hemos mantenido webservice\_course.php en mucho tiempo. Mejor usa registration.soap.php que tiene una función de creación de cursos que, según sabemos, funciona bien.

Cerraremos esta tarea dentro de 7 días si es que no hay actualización.

**#2 - 12/10/2014 08:35 - Yannick Warnier**
