Category:	Tracking / Reporting	Estimated time:	0.00 hour
Target version:	3.0	Spent time:	0.00 hour
Complexity:	Normal	SCRUM pts - complexity:	?

Description

A few years back, we implemented a timeline feature [1][2] that didn't really stick.

The idea is to improve the visualization and the data shown to make it beautiful.

First, change the visualization to this <https://github.com/marmelab/EventDrops> to make it more attractive.

Second, add additional user events. For example, check the `c_item_property` table for everything created or updated by the user in courses/sessions and show it on the graph in one line per tool (General, document, work, forum).

If the skills tool is enabled, also check when a user is assigned a new skill and reflect it on the timeline. If the skill is attached to a badge, show the badge.

Improve the visualization (pass on to the designer for that)
