

Chamilo LMS - Bug #7329

different format in query join between c_item_property and c_### tables

Description

Hi,

In the database the link between c_item_property and c_document seems wrong, isn't it ?

Indeed, in the join with have c_item_property.ref = c_document.id but c_document.id is int(10) and c_item_property.ref is int(11).

There are other c_##### tables that have id int(10).

Normaly when the elements of a join are different the query is not optimize.

Is it normal ?

Is the simple fix to change int(10) into int(11) ?

History

#1 - 15/10/2014 10:19 - Agathe Hubert

- Category set to Database & API changes

concerns the 1.9.6 version

#2 - 15/10/2014 18:55 - Yannick Warnier

- Target version set to 1.9.10

#3 - 20/10/2014 09:14 - Julio Montoya

- Target version changed from 1.9.10 to 2.0

This require a DB change. Can't be fixed in 1.9.x. Moving to v10
