Description
In the calendar list view, the eye icon doesn't do anything!?

Is this one solved?
We have several issues with the eye-icons since a few months. Creating a new course or changing the intro text sometimes 'disables' all the eye icons on a course frontpage.
It is some javascript code bug but have not found the cause yet.

Hi Jan, no, this is not javascript in this case but just the fact that the eye icon is not made to work in the global agenda view (just on the course-specific agenda view).
If you can reproduce the other bug you are talking about (all eye icons being disabled), please register a new bug. I myself have never experienced it.

The fix works. It's just a matter of a slight code form review.

I had to make an additional fix because of one course_id that had been changed to cid but that shouldn't. Apart from that, this is working now.
