

Chamilo LMS - Feature #7413

Limit to one concurrent connection per account

20/11/2014 10:50 - Julio Montoya

Status:	Feature implemented	Start date:	20/11/2014
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	1.9.10	Spent time:	0.00 hour
Complexity:	Normal	SCRUM pts - complexity:	?

Description

Limit to a single connection per account: ability to use multiple items or multiple IP addresses but NOT simultaneously.

Use a configuration parameter to enable this feature.

```
// Prevents one user account to connect from more than one device at a time
// $_configuration['prevent_multiple_simultaneous_login'] = true;
```

See: <https://task.beeznest.com/issues/8796>

- Description updated

#2 - 20/11/2014 10:53 - Julio Montoya

- Description updated

#3 - 20/11/2014 10:57 - Julio Montoya

- Status changed from New to Feature implemented

#4 - 20/11/2014 14:31 - Yannick Warnier

- Target version changed from 1.10.0 to 1.9.10

Actually it's in 1.9.10 then.

#5 - 15/12/2014 18:26 - Laura Guirao

How can I test it?

In a Chamilo 1.9.10, I have uncommented this line: `$_configuration['prevent_multiple_simultaneous_logins'] = true;` in configuration.php file but it doesn't seem to work

It is necessary another configuration value?

#6 - 15/12/2014 19:16 - Yannick Warnier

No, what you did should be enough, but you should also disconnect completely from the portal **before** connecting with two different browsers.

#7 - 18/12/2014 13:40 - Laura Guirao

I have tested it with two browsers in my computer and also with two computers with different IP. I can access with the same user in both cases. I don't know...

#8 - 18/12/2014 14:07 - Julio Montoya

There was a typo, the configuration setting is: "login" instead of "logins"

```
$_configuration['prevent_multiple_simultaneous_login'] = true;
```

#9 - 18/12/2014 14:08 - Julio Montoya

- Description updated

#10 - 18/12/2014 16:04 - Laura Guirao

Ok, with this change it works perfectly
