

## Chamilo LMS - Feature #7538

### Move (some) settings from main/install/configuration.dist.php to settings\_current table

19/02/2015 18:40 - Yannick Warnier

<b>Status:</b>	Feature implemented	<b>Start date:</b>	19/02/2015
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>	Yannick Warnier	<b>% Done:</b>	100%
<b>Category:</b>	Database & API changes	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>	1.10.0	<b>Spent time:</b>	6.08 hours
<b>Complexity:</b>	Normal	<b>SCRUM pts - complexity:</b>	?
<b>Description</b>			
Move most settings from the config file to the settings_current table. Some settings will have to remain in the config file though, like the prevent_delete_users, as an admin shouldn't be able to change it.  There is a considerable amount of work to be done here to put each setting in a sensible category and add a title and a comment to language variables.

#### History

**#1 - 07/05/2015 19:54 - Yannick Warnier**

- % Done changed from 0 to 10

## #2 - 20/05/2015 08:36 - Yannick Warnier

Also add the sso subclass as explained in drupal-chamilo module's readme

## #3 - 23/05/2015 07:26 - Yannick Warnier

Moved remaining parameters to database. Only missing translations now.

## #4 - 24/05/2015 20:48 - Yannick Warnier

The procedure here is as follows:

- add the setting to an src/Chamilo/CoreBundle/Migration/Schema/V110/Versionxyz.php (using `$this->addSettingCurrent()`) (thinking deeply about the default value and the language variables names)
- add the setting (and options) to the settings\_current and settings\_option tables in main/install/data.sql
- update the database version in Versionxyz.php, data.sql and database.sql
- check if maybe some of the settings can be removed by just altering the database (some settings were there only because they required a database change in previous versions)
- remove the setting from main/install/configuration.dist.php
- add the Title and Comment variables to translate.chamilo.org and translate to English
- search for all uses of these variables in the Chamilo code and make sure that all calls to `$_configuration['variable']` or `api_get_configuration_value()` are replaced by `api_get_setting()` and that the value is checked against the **string** value of the setting ('true' rather than true)

## #5 - 24/05/2015 22:25 - Yannick Warnier

- Status changed from Assigned to Feature implemented

- % Done changed from 10 to 100

Moved all necessary settings to migrations.
