- File hooks 1.jpg added
- File hooks 2.jpg added
- File hooks 3.jpg added

Hello,  
I created a folder in: main / inc / lib / hook and inside it put the HookManagement.php file.  
Hoping to correct this problem of image.  
I understand that this patch was for.  
It did not work for me.  
Chamilo beta 1.9.10.  
greetings;  
Marcelo Bassuma  
ps:where it is recorded in the database in order to exclude the hook manually.

##### #3 - 26/02/2015 16:04 - Angel Quiroz

Hello  
The hooks are a system to make actions when a plugin is installed on **version 1.10.x**  
Really, your problem is with the Ticket plugin, this adds a new tab on the menu bar when is installed regardless its own configuration.  
You can report a new bug about this plugin

##### #4 - 26/02/2015 17:35 - Tomas Rodrigues

Hi,  
Thank you for taking my question and the tip to open a new ticket.  
Regards,

Marcelo Bassuma

**#5 - 02/04/2015 07:18 - Yannick Warnier**

- Status changed from Needs testing to Bug resolved

- Assignee set to Angel Quiroz

- % Done changed from 80 to 100

Hi Marcelo,

All hooks register their data in hook\_\* table (which only exist in the 1.10.x branch).

All plugins register their settings in settings\_current.

Hooks only exist in 1.10.x, so they will **not** work in 1.9.10.

In your pictures, the issue is with the ticket plugin, **NOT** with hooks, so you only need to search "SELECT id, variable FROM settings\_current WHERE variable LIKE '%ticket%' and delete all of it.

In the meantime, I'm closing this issue (related to hooks).

**#6 - 02/04/2015 19:11 - Tomas Rodrigues**

Hello,

Yannick Warnier.

Thanks for the reply.

You're right.

I will try to look for what you said and delete.

Sincerely Yours;

Marcelo Bassuma

ps: the version 1.9.10.2 this a rocket.

congratulations.
