

Chamilo LMS - Bug #7566

With test allowing one attempt, users are not able to revisit the test result

03/03/2015 11:19 - Annick Vdp

Status:	Bug resolved	Start date:	03/03/2015
Priority:	Normal	Due date:	
Assignee:	Imanol Losada	% Done:	0%
Category:	Exercises	Estimated time:	0.00 hour
Target version:	1.10.0	Spent time:	7.38 hours
Complexity:	Normal	SCRUM pts - complexity:	?

Description

When users finish a test that has one attempt and is included in a learning path, they can see the test result immediately after finishing the test.

But when they want to see the results again afterwards they are not shown the result in a list of attempts (as is done with tests with unlimited attempts), they only see the message "You cannot take test Exam because you have already reached the maximum of 1 attempts". I'm assuming this is a bug, as I can not imagine it being set on purpose ... (it used to work on previous versions and I tested now on 1.10 own installation and stable.chamilo.org)
