

## Chamilo LMS - Bug #7588

### Comments for test results don't show up!

<b>Description</b>			
When I validate a test, the comments that I add for each of the students' answers (the "Edit individual feedback" field under each question) don't show up after saving my review. I don't see them after opening the feedback again, and neither does the student. I've lost quite a few comments, adding them in the certainty that they are being saved and students can see them, before I realized they were not there.

This might be related to [#7448](#), where educators, in sessions, were able to comment on attempts, but the submit button failed. I had to modify the code in order to make this work.

first we tried to allow coaches to edit in sessions, but had to turn this off, as this enabled coaches to erase central tests through the excercises pool.

...torkil... still on 1.9.8 until. next week :-)

- *Category set to Exercises*

- *Target version set to 1.10.0*

Thanks for reporting. We'll try to verify that on 1.10.x. We don't support earlier versions for small bugs, but hopefully the patch we provide for this one in future versions can be applied to your version easily.

- *% Done changed from 0 to 70*

Tested on 1.10. It works fine.

Steps done:

- Create an exercise as admin

- Complete it as student

- Validate it as admin, add feedback and save

- Edit feedback and save again

**#5 - 25/03/2015 17:06 - Imanol Losada**

Student test validation URL fixed

- Status changed from Assigned to Bug resolved

- Assignee changed from Yannick Warnier to Imanol Losada

- % Done changed from 70 to 100

Closing (not reported any issue with the patch)

**#7 - 08/04/2015 21:50 - Yannick Warnier**

- Status changed from Bug resolved to Assigned

Simbulu reports on IRC that the issue is still present in 1.9.10.2 and would like to help fix it.

**#8 - 09/04/2015 17:12 - Torkil Zachariassen**

- File `exercise_show.php` added

The comments worked fine in 1.9.8, but broke after an upgrade to 1.9.10 (Note: This is *not* against 1.10.0, but 1.9.x)

Testing various versions of `exercise_show.php` from

[https://support.chamilo.org/projects/chamilo-18/repository/changes/main/exercice/exercise\\_show.php?rev=1.9.x](https://support.chamilo.org/projects/chamilo-18/repository/changes/main/exercice/exercise_show.php?rev=1.9.x)

(`exercise_show.php`, `exercise_show.php-1.9.8-works`, `exercise_show.php_73e38162`, `exercise_show.php_fc3508ec`, `exercise_show.php.000`, `exercise_show.php_470c12d0`, `exercise_show.php_9e5c73a8`) provided some insight:

BROKEN: 9e5c73a8

BROKEN: 73e38162

WORKS: 470c12d0

WORKS: 9e5c73a8

WORKS: fc3508ec

Thus the latest version that works, is 470c12d0

The culprit was found to be 73e38162 ( BT#9247

<https://support.chamilo.org/projects/chamilo-18/repository/revisions/73e381620438970423d371e717ad0bb8d5667a29> ), and I did not manage to fix this part.

Using 470c12d0 I managed to incorporate the changes from the latest version (9e5c73a8) by hand. So basically we can use the latest version, but have to eliminate whatever happened in 73e38162.

The result is attached, and works for me as a workaround for now.

Julio, could you review this? It has to do with your changes to the max number of fckeditors, but note that this is only for 1.9.x (so don't send anything to 1.10.x)

I just apply a fix to this issue.

Now it should work.
