

Chamilo LMS - Feature #7719

Add visual access dates and coach access dates to sessions creation

27/05/2015 15:31 - Yannick Warnier

Status:	Feature implemented	Start date:	27/05/2015
Priority:	Normal	Due date:	
Assignee:	Julio Montoya	% Done:	100%
Category:	Database & API changes	Estimated time:	0.00 hour
Target version:	1.10.0	Spent time:	7.96 hours
Complexity:	Normal	SCRUM pts - complexity:	?

Description

As developed in a separate branch for icpna, the sessions should have six dates in total:

- student access start date (this is the current session start date)
- student access end date (this is the current session end date)
- coach access start date (this is the current session start_date modified with the "days before" setting)
- coach access end date (this is the current session end_date modified with the "days after" setting)
- session visual start date (this is the start date as shown visually in sessions lists - by default the same as the student access start_date)
- session visual end date (this is the end date as shown visually in sessions lists - by default the same as the student access end_date)

Ideally, these start/end date should all be datetimes (for more precise control) although I don't think we need more than a precision of an hour)

The current global setting for default coach_access_start_date and end_date should be taken into account when auto-generating the coach start and end date on the basis of the student start and end date).

These 6 options should all be an **alternative** to the **session_duration** attribute, which doesn't allow for any specific dates. In this case, the students get a calculated access date, and the tutor has always access to the session.

Web services should also be modified to accept multiple dates (optionally), in a way that lets previous webservice calls still work but that enables the optional setting of more dates.

If only student access dates are set (they should be the first to be shown), then all other dates are set to these values by default.

These 6 options should all be an alternative to the session_duration attribute, which doesn't allow for any specific dates. In this case, the students get a calculated access date, and the tutor has always access to the session.

session_duration depends in a start date.
I suppose this date is "student access start date". By default will be the creation date.

#4 - 28/05/2015 14:12 - Julio Montoya

Ah yes, I remember that session duration it was based in the user ...

#5 - 30/05/2015 07:50 - Yannick Warnier

- Status changed from Assigned to Needs testing

- % Done changed from 0 to 90

There has been some confusion on my side, I think: I thought you were done with this task, so I started making a few changes and in the end I spent hours configuring the whole change.

I believe most of it is done now. The only things to review is if inserting a session without dates works.

Exactly. I still have some changes to do. I just sent my changes now even if they broke some parts to avoid more confusion.

#7 - 23/06/2015 00:49 - Yannick Warnier

I think it's working now. Julio, what changes were you still about to send?

#8 - 02/07/2015 12:10 - Julio Montoya

- Assignee deleted (Julio Montoya)

I already sent all my changes and I was continuously fixing all the old date values.

#9 - 02/07/2015 16:52 - Yannick Warnier

- Status changed from Needs testing to Feature implemented

- Assignee set to Julio Montoya

- % Done changed from 90 to 100

OK, I also think we can close this.
