Description

The home page links

"inbox" and "social network" are not working for me.

I am using unstable.chamilo.org

Image attached.

- Status changed from Assigned to Needs more info

- Assignee deleted (Angel Quiroz)

It works for me

#3 - 15/09/2015 12:58 - Yannick Warnier

Works for me too. Could you be more specific about the issue and how you reproduce it?
Will close this if no further details provided within 3 days.

#4 - 15/09/2015 13:03 - AliaMori com

Hello Yannick and Angel,

I figured out why certain links are not working for me:

I use AdBlock on my browsers. Here is an article with comprehensive statistics on % of people using adblock extensions and software.
<http://www.quora.com/What-is-the-percentage-of-Internet-users-that-employ-AdBlock-Plus-or-similar-ad-blocking-plugins>

When enabled, the homepage links that do not work for me are: Inbox, Compose, Pending invitations, and social network

cheers,

r

#5 - 16/09/2015 23:32 - Angel Quiroz

- Status changed from Needs more info to Assigned

I installed the AdBlock Plus plugin on Firefox with the "Remove Social Media Buttons" setting enabled. And effectively some tools from Chamilo stop working. This, because AdBlock Plus hides certain classes in HTML documents.

The `section-social` and `social-menu` classes are used in Social Network and Inbox tools.

To solve this bug, I renamed these two classes to `section-social-network` and `social-network-menu`. *They are probably blocked later*

There are icons named like `social-*.png` blocked.

#6 - 16/09/2015 23:35 - Angel Quiroz

- Status changed from Assigned to Needs testing

#7 - 17/09/2015 01:52 - AliaMori com

I tested on both Chrome and Firefox: Thus far it is working perfectly.
Cien mil gracias.

- File Adblock Chamilo 1.10.pdf added

Angel, You most likely already saw this:

Here attached is a list of the "blockable items" on Chamilo 1.10 as per Adblock Plus (Firefox version) -- this list is generated with the following filters enabled: potential ads, social media buttons, tracking and malware domains.

In the users manual, it might be advisable to add a reminder to administrators and teachers to add Chamilo to their "whitelist" if using AdBlock or similar plugins.

Thank you for your time.

#9 - 17/09/2015 02:22 - AliaMori com

Only the first 8 items in the attached list are marked as "blockable" --- sorry.

#10 - 22/09/2015 16:34 - Yannick Warnier

- Status changed from Needs testing to Assigned

- Assignee set to Angel Quiroz

- % Done changed from 0 to 40

#11 - 22/09/2015 20:35 - Angel Quiroz

- Status changed from Assigned to Needs testing

- Assignee deleted (Angel Quiroz)

- % Done changed from 40 to 80

Fixed. Image files renamed with the `sn-` prefix

Hi Robert, please check on unstable.chamilo.org and let us know if this works for you.

#13 - 23/09/2015 02:23 - AliaMori com

Hello Yannick,

As you know: I don't know squat about programming.
As a practitioner:

There are different plugins and services out there for ad blocking.
I use Adblock Plus from <https://eyeo.com/> , a nice German company that specialises in open source software.
Adblock Plus seems to be more comprehensive when I use it on Firefox versus Chrome.
To be thorough, I enable all filters (potential ads, social media buttons, tracking and malware domains.)
On Firefox, I simply click "open blockable items". When I do this now, after the fix by Angel, I no longer observe any blockable items.
The 8 previous items are no longer highlighted.
From an amateur's point of view, it seems to be 100% fixed.

cheers and thanx!

r.

- Status changed from Needs testing to Bug resolved
- Assignee set to Angel Quiroz
- % Done changed from 80 to 100

No need for technical review, don't worry, I just expected you to did exactly what you did: try it online and see if it looks fine.
If all of our team had to install all the plugins and software that our users use that affects their navigation, it would be a nightmare, so we usually kindly ask our reporters to check after we published a patch, just to make sure that the developer doesn't have a false idea of what should have been fixed.
This is our quality assurance process. If the reporter is available and acknowledges that the bug is fixed, and given the previous internal validation by one of our senior developers, we're good to go.
