**Description**
Not sure if this is a bug or not:
When the gravatar user picture function in is enabled on system.php (using unstable.chamilo.org) it overrides and automatically replaces any previous profile images that had been uploaded.

This shouldn't be the case, indeed. It should only set an image when there is no local image already (priority to the local avatar)

#2 - 07/10/2015 20:12 - Yannick Warnier
- Assignee changed from Julio Montoya to José Loguerio

#3 - 12/10/2015 19:05 - José Loguerio
It should work properly now
