Description

Hi

Just tried the 1.10.0 version: there's a fatal error when enable_iframe_inclusion option is enabled:
Class 'HTMLPurifier_Filter_AllowIframes' not found in main/inc/lib/security.lib.php on line 341

This src/Chamilo/CoreBundle/Component/HTMLPurifier/Filter folder should be added to classmap.

History

#1 - 31/10/2015 16:17 - Paul Wolstencroft
Just confirming we got the same error during testing 1.10.

#2 - 02/11/2015 09:02 - Julio Montoya
Should be fixed with:

https://github.com/chamilo/chamilo-lms/commit/eae9d76b23485e89e5d34a95d99eb14a5435c654

#3 - 02/11/2015 09:03 - Julio Montoya
- Status changed from New to Needs testing

#4 - 05/11/2015 04:27 - Yannick Warnier
- Category set to Global / Others / Misc
- Status changed from Needs testing to Bug resolved
- Assignee set to Julio Montoya
- % Done changed from 0 to 100

I've had the issue, applied the patch and it worked. This is good enough, unless Kevin reports otherwise.
