Description
In 1.9, there was a jplayer feature in the documents list to play an audio without opening a new page.

This looked like this:

```

```

In 1.10, this is broken.

The first issue is to re-establish the proper filtering. In document.lib.php, lines 5347-5349 + lines 5385-5387, the "/mp3$/i" form should be replaced by "\.mp3/i", mostly because the URL usually contains "?cidReq=" now.

Once this is fixed, the icons re-appear but the play and stop buttons appear at the same time, and the feature is not working. Something must be wrong in the associated JS or CSS code.

Funciona para OGG, pero no me funcionaba para MP3

Enviaré el commit d16ecc9

#7 - 19/12/2015 00:26 - Yannick Warnier
- Status changed from Needs testing to Bug resolved
- Assignee set to Angel Quiroz

Now it works perfectly (with the latest commit by Angel fixing an issue in the browser features detector).
