Description
I'm using this version of mysql:

Server version: 5.7.10 MySQL Community Server (GPL)

And I have some error with

An exception occurred while executing 'SELECT * FROM settings_current
 WHERE access_url = 1 AND category='search_setting'
 GROUP BY variable ORDER BY id ASC

SQLSTATE[42000]:
Syntax error or access violation:
1055 Expression #1 of SELECT list is not in GROUP BY clause and contains nonaggregated column 'chamilo.settings_current.id' which is not functionally dependent on columns in GROUP BY clause;

this is incompatible with sql_mode=only_full_group_by,

referer: http://localhost/chamilo/main/admin/

Question is do you have the same errors? ;)

I don't have MySQL 5.7 so I couldn't test, but I think it's safe to consider it OK

#6 - 08/04/2016 12:27 - Julio Montoya
- Subject changed from MYSQL error incompatible with sql_mode=only_full_group_by, to MYSQL 5.7 error incompatible with sql_mode=only_full_group_by,

#7 - 02/05/2016 15:16 - Julio Montoya
Note: To ignore those errors a sql query should be run in the "Database::connect()" function:

$connection->executeQuery('set sql_mode=""');
