Gradebook items history shows current weight instead of previous weight

In 1.10.x of today:

- create a course
- go to gradebook
- create an offline evaluation with a weight of 0
- in the list of items of the gradebook, click the pencil icon to edit the offline evaluation
- change the weight to 50
- in the list of items of the gradebook, click on the "history" icon (step marks) to get to gradebook_showlog_link.php
- the register shows (in French) "Poids de la ressource précédemment" (= "previous" weight): 50.

The "previous" weight should be "0".
