In Chamilo 1.10.2 (I think) it was still working:

- admin page
- edit portal homepage
- add page ("Add a page (CMS)") at the bottom of the right side of the screen
  - check the "Add in menu" and add a description but leave the URL box empty

This should show an additional tab. It doesn't.

Broken in current 1.10.x (and probably 1.11.x)
Still doesn’t work for me in 1.11.chamilo.org.
The additional block with links should appear below the other block on the homepage:
