

Chamilo LMS - Feature #8192

More info about the incomplete prerequisites

08/04/2016 20:07 - Yannick Warnier

Status:	New	Start date:	08/04/2016
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Learning paths / Lecciones	Estimated time:	0.00 hour
Target version:	2.0	Spent time:	0.00 hour
Complexity:	Normal	SCRUM pts - complexity:	?
Description			
<p>In the learning path, when a prerequisite has not been completed, the current message is simply "Some prerequisites have not been completed".</p> <p>Initially, this was left very neutral, due to the fact that SCORM 2004 (never really became popular enough before TinCan) allows you to define a combination of prerequisites, so it would become a bit complex to deal with.</p> <p>However, we could avoid this issue, simply by pointing to the first element to be completed in the whole prerequisites chain, and showing its title + a link to go back to this element.</p> <p>The message would then become:</p> <p>"To see this page, you first need to finish step '[Name of the step + link to it]'".</p> <p>I think this would make a great addition to the current usability of the learning path.</p>
