Target version:		Spent time:	0.00 hour
Complexity:	Normal	SCRUM pts - complexity:	?

Description

When you create a multiple choice question, you can't add audio in the answer. After saving, the audio is deleted (maybe CKEditor strips code?)

Also when you add audio to the question text itself, you can't turn off autoplay. In the audio options there is a parameter for autoplay, but it changes back to the original state after saving.
