after creating survey, confirmation message appeared (green field). Language used for confirmation message is not taken from course language definition, but from platform. Eq.: course in english, user's language is spanish, platform language is set to slovenian; confirmation is in slovenian, should be in english? (or spanish?).

just saw. And i did some tests:
- works with chosen course language
- and with user language when course in user language is selected (course option)
i did not play with using different platform language order
the solution is good enough for me
