Description
looks like little typo when accessing icon image from create backup/import backup; icon with name 0.gif (zero.gif - small plus sign) should be addressed instead of O.gif (capital_o.gif) that does not exists in main/img

- Category set to Backup
- Target version set to 1.11.0

By reporting it one week earlier, we could still have fixed it in 1.10, but now it's gonna have to wait for 1.11 :-)

It's nice to have you back. I accepted your PR and added it to 1.11 as well.
It's still not 100% functional but you should soon be able to confirm your change satisfies your needs by checking https://1.11.chamilo.org (admin/admin).

I suppose you confirmed this on your local install, right? Can we close it?

#4 - 26/05/2016 12:31 - Marko Kastelic
it's functional on 1.11.chamilo.org but...
used icons are of different sizes (9x9 vs 15x15). I removed dependancy for gifs and replaced them with font-awesome icons (already loaded)
adding https://github.com/chamilo/chamilo-lms/pull/1180
after layout check issue can be closed

This PR was sent to master, it should be sent to the 1.11.x branch

#6 - 26/05/2016 12:56 - Marko Kastelic
sorry, will be more careful in the future. It's compatible down to 1.10 (locally tested)

You need to update your PR to select the right branch (not sure if this is possible)
Or delete that PR and create another PR directed to 1.11.x

#8 - 26/05/2016 16:58 - Marko Kastelic
removing old, adding new PR: https://github.com/chamilo/chamilo-lms/pull/1182

#9 - 31/05/2016 10:03 - Marko Kastelic
- Status changed from New to Bug resolved

it's functional on 1.11., and looks nice. closing.

hand (cursor) is not shown when mouse is over +,- sign, since the img was previously replaced by span. I suggest to add

   .fa-plus-square-o, .fa-minus-square-o { cursor:hand; cursor:display; }

to the web/css/base.css
the main reason is that elements are not easy taggable (many different classes; each category has it's own class: img_documens, img_glosary, ...)
is this acceptable ?
and: we could change cursor on (descriptive) text right of the sing (already clickable) too

I just applied this change:

   https://github.com/chamilo/chamilo-lms/commit/ec9316274e76b906afe2abff9fc006481a47f15b

Requires composer update

Marko, this is left for you to test out.
I updated https://1.11.chamilo.org/ so you can check it from there.

#14 - 30/06/2016 08:58 - Marko Kastelic

it's ok on partialials: backup, restore and course copy(chrome, safari,ff, ie,konqueror,some older samsung phone stock browsers, aosp browsers before chrome). In my previous suggestion (above) cursor:hand is added only for possibility of compatibility with IE browsers v 5.5 and below. Returning this one for closing. Thanks.

Alex, podrías checkear esto?: falta estilo cursor:hand en el "+" de despliegue de las opciones del menú de elementos seleccionables en la toma de backup
