SCRUM pts - complexity: 

Description
When trying to create a grading model, there's a markup breagage on this page:
https://1.11.chamilo.org/main/admin/grade_models.php?action=add

It exists in both 1.10.6 and in 1.11 on the test servers...

- % Done changed from 80 to 100

OK for me, although it would be nicer to have examples of the content we expect in those fields:
Score (%) = Acronym . .. Title

#5 - 13/07/2016 07:09 - Jurgen Gaeremyn
Also... it's completely unclear how the grading works.
The sum of the values (left column) have to add up to 100.
So how do I get:
50% = OK : Succeeded
80% = + : Good result
90% = ++ : Great!

(the above is what I would expect, but they don't add up to 100)

#6 - 13/07/2016 07:18 - Yannick Warnier

Oh no, that's not how the "grade model" works. The grade model actually serves to create gradebook evaluation models (the repartition of ponderation between items in the gradebook for every new course to be created). What you want is the gradebook scoring system [1] but there's no way to have a default platform setting for that at the moment...
