Did you "Clean archive directory" (option available in your administration panel)? If you upgraded in any way from a previous version, please do. I'll add that to the installation/upgrade manual. Forgot to do so.

I tried 'Clean archive directory' twice and received Fatal error: Maximum execution time of 60 seconds exceeded in /usr/www/users/futurmpskj/vendor/symfony/filesystem/Filesystem.php on line 436. No change to the forum problem.

Happy to say the issue is resolved. Thanks to yannoo1 who pointed out I need to uncheck the spell-check. Thank you so much.
