Add option to remove course creation welcome screen

When creating a course, there's an intermediate screen giving suggestions on what to do... This seems to confuse teachers because it's a screen that only appears at this point.

Add an admin setting (in the course category) course_creation_splash_screen

$CourseCreationSplashScreenTitle = "Course creation splash screen";
$CourseCreationSplashScreenComment = "The course splash screen show a series of suggested options to the teacher when creating a new course. Disable it to let your teachers land directly on the course homepage.";

Option added in https://github.com/chamilo/chamilo-lms/pull/1249
