Description
For some languages the button for asciimath is not displayed correctly. This is caused by a wrong translation name in setLang. It fails in finding the buttonname and the pathName.

This in main/inc/lib/javascript/ckeditor/plugins/asciimath/lang/nl.js:

CKEDITOR.plugins.setLang( 'mathjax', 'nl', {  

Should be:

CKEDITOR.plugins.setLang( 'asciimath', 'nl', {  

This is for the following languages the cause:
nl, no, pl, pt-br, pt, ro, ru
